Solid brick wall
It's possible to use hook of fixing with screws.

Wande aus massiven Backsteinen
Es ist moglich Befestigunshaken mit Schrauben zu verwenden.

2

Ideal distance between hooks
If there is 3m space for a standard hammock of 4m, otherwise position the hooks so the hammock hanging stay at least 40cm away from the floor.

Ideale Entfernung zwischen den Haken
Wenn moglich, 3 Meter fur eine 4 Meter lange Hangematte. Falls es nicht moglich ist, soll man die Haken so positionieren, daß die Hangematte wenigstens 40 cm vom Boden entfernt gehangt werden kann.

3

The hook
The ideal is to install it 1.90m from the ground in spaces small, the hook should get lower. (use the gear unit not to deform the strings)

Haken
Am Besten soll man sie in einer Entfernung von 1,90 M vom Boden installieren. Bei kleineren Raumen sollen die Haken etwas niedriger angebracht werden. (Um die Schlaufenseile nicht zu beschadigen, soll man ein Verkurzungsgerat benutzen)

4

Block wall
since the block is hollow, you need help of hooks that are fixed in the masonry - those of screw do not fit. The block must be filled with cement for after hook be fixed to the wall. Wait 24h to hang the hammock.

Wande aus Hohlblocksteinen
Da die Backsteine hohl sind, sollen die Haken am Mauerwerk fixiert werden, jedoch diejenige mit Schrauben sind nicht dafür geeignet. Der Blockstein soll mit Zement gefüllt werden, und erst dannach kann der Haken an die Wand angebracht werden. Es wird empfohlen 24 Stunden zu warten, bevor man die Hängematte hängt.
